

This book is two books in one ~

First of all, it is a history on a property known as Dell's Mill, North of Augusta, Wisconsin. Built in 1864, it dates back to America's civil war times.

The second book tells of Mr. Clark's experience as an uninsured and unprotected hospital patient -- an ordeal that may be shared by *over one hundred million Americans* in our country today. This part of the book he labels America's Health Care War.

The Civil War to America's Health Care War: 150 Years
